

## **Robert Riggs' iPhone Camera Gear List**

This iPhone video rig enables you to quickly produce short talking head soundbites to upload to social media channels. You can also use it on location to shoot interviews and b-roll.

I tested a wide variety of low camera cost gear that would produce professional quality iPhone video. After trial and error, I found that this assembly of iPhone video camera accessories works best for my type of videos.

I've recommended this to journalists, professionals such as lawyers and financial analysts, a hot rod shop, and small business owners who need to quickly publish videos.

## **iPhone Video Rig Components**

The following are components of the iPhone Rig. I recommend what I believe are the best video equipment solutions and do not receive any form of compensation from the manufacturer's of these accessories.

The accessories are available for a total price of approximately \$350.00
